EXPERIENCE

HARBOUR TECH: June 2024 - Present

Developed and maintained CRM systems for real estate apartment sales in Spain and Dubai. Built user-friendly interfaces and components in React to manage customer data, track leads, and support sales operations. Collaborated with backend teams to integrate APIs and ensure smooth data management across platforms. Optimized performance and improved user experience for internal sales teams.

Marketplace Application Development (startup) - December 2023 – June 2024

Collaborated with a team to develop a web-based marketplace application from scratch using React. Responsible for building reusable UI components based on Figma designs, ensuring accessibility and responsiveness. Implemented unit and e2e tests for components using Jest and Cypress, writing documentation in Storybook. Contributed to SEO optimization efforts by improving page title tags, meta descriptions, and content structure. Proactively sought opportunities to learn and grow within the team, contributing to a cohesive and productive development environment. Configure JWT based authentication

EDUCATION

Kyiv College of Communication
